Art Unit: 1774

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to an article, classified in class 428 or 524, subclass various.

II. Claims 10-20, drawn to a method of making an article, classified in class 264, subclass 211.23.

If group I is elected, applicant is required to elect a single disclosed species from claim 6.

2. The inventions are independent or distinct, each from the other because:

3. Inventions group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different method such as providing, heating, spinning, extruding, cooling, and stacking.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to John Hornickle on 4/24/06 to request an oral election to the above restriction requirement, but did not result in an election being made.
